**Clinic Pack** developer and fixer was specifically packaged for smaller offices and clinics, yet it remains a premium formulation. Clinic Pack allows facilities to mix in smaller quantities thereby extending the life of the product. Additionally, Clinic Pack is a great fit for the AGFA CP-1000 and other processors with particular replenishment systems.

**Clinic Pack** is packaged as one large bottle and one small bottle which when mixed with water makes 20 liters of ready-to-use automatic x-ray developer or fixer. Clinic pack works well with all processors and films in a range of cycles and temperatures.
